### ITU-T SG13

- Focus Group on IMT-2020 (FG IMT-2020) has accomplished its mission.
  - The deliverables produced by the Focus Group at its closure are available from the following link <u>FG IMT-2020</u>: Nine

  - "IMT2020: How SG13/WP1 will face 5G challenges" Luca Pesando
- The May TSAG meeting is requested to review, possible to comment and endorse the new JCA-IMT-2020.

## JCA IMT-2020 - Proposed scope

• The scope of JCA-IMT2020 is coordination of the ITU-T IMT2020 standardization work with focus on non-radio aspects within ITU-T and coordination of the communication with standards development organizations, consortia and forums also working on IMT2020 related standards.

## JCA - proposed objectives

- 1. The JCA-IMT2020 will ensure that the ITU-T IMT2020 standardization work with focus on non-radio aspects is progressed in a well-coordinated manner among relevant study groups, in particular, Study Group 2 on Network Management, Study Group 11 on protocols and interoperability, Study Group 12 on QoS, Study Group 15 on transport, fronthaul/ backhaul and Study Group 17 on security.
- 2. Whenever duplication of effort or planning issues are discovered, the JCA-IMT2020 will report this to Study Group 13 as the lead study group to coordinate all activities related to IMT2020 with other relevant study groups.
- 3. The JCA-IMT2020 will consider and encourage possibilities of co-operation on IMT2020 non-radio aspects, namely with relevant subgroups such as 3GPP, BBF, ETSI, IEEE, IETF, MEF, NGMN etc as well as Open Source community.
- 4. The JCA-IMT2020 will analyze the work of standards development organizations, consortia and forums for use in its coordination function and will provide information on this work for use by the relevant study groups in planning their work.
- 5. In order to avoid duplication of work and assist in coordinating the work of the study groups, the JCA-IMT2020 will act as a point of contact within ITU-T and with other standards development organizations, consortia and forums working on IMT2020 related standards.
- 6. The JCA-IMT2020 will maintain the roadmap for IMT2020 standardization which addresses on-going and published specifications from ITU, other relevant standard development organization, consortia and forums.
- 7. In carrying out the internal coordinating role, participants in the JCA-IMT2020 will include representatives of relevant ITU-T study groups and other ITU groups.
- 8. In carrying out the external collaboration role, representatives from other relevant standards development organizations, regional/national organizations, consortia and forums shall be invited to join the JCA

# IEEE 802 position

### JCA contributions

- From IEEE-SA
  - Suggest IEEE-SA contribution introducing 5G related standards be based on list prepared by IEEE 5G Initiative -<a href="http://5g.ieee.org/standards">http://5g.ieee.org/standards</a>
- IEEE 802 sponsor level
  - Prepare to send an 802 level liaison in response to JCA announcement in time for inaugural July meeting
    - Summarize our 5G direction (based on conclusion of 5G/IMT-2020 SC, and outcomes: AANI & ICAID)
    - Request additional details to add from WG
    - Discuss/Approve on June EC call
- Per IEEE 802 WG
  - After initial 802 liaison, as necessary

## Summary

- The various conferences for this year were reviewed.
  - There is minimal impact to the work of IEEE 802
  - It was suggested that for GSC, a relevant hot topic would be:
    - How SDOs can evolve to better help industry?
- JCA IMT-2020 liaison
  - IEEE-SA based on 5G initiative
  - IEEE 802 based on WG input
    - approve before July plenary
