8.00 Reports from WG and SC Chairs
8.01 II 802.1 joint project with IEC
This is an information item to introduce a new joint project proposal between IEC and IEEE 802.1 that is in discussion on a profile of 802.1 TSN for industrial networks.

Parsons presented ec-17-0169-00-INTL-ieceeiee-jwg-proposal.pdf. See attached document.

General discussion –
Ballot processes will be aligned – IEC and IEEE will be able to see all comments from both sides. Haas indicated that the comments from IEEE 802 are exported to an IEC template. Rosdahl left at 1:49pm

Document would be IEC template.

Parsons may request waivers for up to 6 invited IEC individuals at 802 plenaries in order participate in person during the joint 802.1/IEC project meetings and to comply with IEC's zero participation fee policy.

8.02 II Report on 802.20 Revision Plan
At the end of July plenary meeting, there was discussion on revising the standards IEEE802.20 to keep the status standards active. As of today, no response indicating the interest in revising the standard has been received. As a result, it is quite unlikely that any activity to revise the IEEE802.20 happens in the November 2017 Plenary Meeting. If no one expresses any interest in revising the standard by the end of this month, we may initiate the process of inactivating the standards in November 2017 meeting.

Action Item: Canchi to provide a status update at the opening 802 executive committee meeting in November
Parsons gave verbal update. He gave overview of July Plenary activity. Noted that Haaz has prepared a survey. Haaz requested individuals who participated in the program, but did not fill out the survey, take the time to complete them. Apurva noted that there was interest in white space.

Goldberg gave overview of the effort and summarized current state., indicating that he anticipated giving it to Rosdahl by mid-day Oct 4. Due date is Friday Oct 6. Nikolich requested feedback on what happens if we don’t apply.

**Action Item – Goldberg / Rosdahl to summarize 802 concerns regarding GDPR Report by end of week (10/6), and submit to GDPR Task Force for review.**

Goldberg noted that he would not be able to provide a direct answer regarding policy issues, but could get feedback. Questions provided are being answered. IEEE is currently not reviewing contents of documents at this time.

R Rosdahl is coordinating a single response from 802.

Law joined at 2:16pm

Thaler noted that some groups have files on grouper, not Mentor.

Law noted he felt special.

Law noted that employers have email backup policies that IEEE can do nothing about.

Thompson noted that since "organizational membership" is the norm in Europe that the IEEE would be subjected to new rules that were effectively biased against the normal practices associated with operating an SDO under the "individual participation" method.

The Recording Secretary encouraged the EC members to review the published unapproved minutes with the same enthusiasm that they were commenting with on his on-screen minute-taking during the call.
