Subject: Request for information on test results of maximum spectral excursion performance

Approval: Agreed to at IEEE 802.3 Plenary meeting, Vancouver, BC, Canada, 14th March 2019

Dear Mr Trowbridge and members of ITU-T Study Group 15,

The IEEE P802.3ct Task Force has become aware of the availability of extensive multi-vendor test results on transmitter maximum spectral excursion performance carried out within ITU-T SG15 over the past 15 years. We would appreciate if ITU-T SG15 could share those results relevant to the development of DWDM optical interface specifications for DP-DQPSK at 100 Gb/s and DP-16QAM at 400 Gb/s.

We would like to thank the ITU-T for our continuing relationship and look forward to further communications.

Sincerely,
David Law
Chair, IEEE 802.3 Ethernet Working Group
