Subject: Liaison request dated 27 Sep 2022

Approval: Agreed to at IEEE 802.3 plenary meeting, Bangkok, Thailand, 17 Nov 2022

Dear Mr Sigfridsson,

Thank you for your request to establish a liaison between the Open Alliance TC 7 and the IEEE P802.3cz and IEEE P802.3dh Task Forces. The IEEE 802.3 Ethernet Working Group does not establish liaisons at the Task Force level, but does establish liaisons between the IEEE 802.3 Working Group and other organizations. IEEE 802.3 Task Forces are dissolved when their specific project is approved.

I am therefore pleased to inform you that the IEEE 802.3 Working Group would be pleased to establish a liaison with the Open Alliance TC 7 based on your request, and Mr. Luis Manuel Torres has been appointed to serve as the Liaison Officer from the IEEE 802.3 Working Group to the Open Alliance TC7.

The P802.3cz Task Force is nearing completion of its work. The IEEE P802.3cz draft is in the Standards Association ballot process, with IEEE P802.3cz/D3.2 recirculation ballot

¹ This document solely represents the views of the IEEE 802.3 Working Group and does not necessarily represent a position of the IEEE, the IEEE Standards Association, or IEEE 802.

expected to be completed prior to year-end. Additional recirculation ballots may be required next year prior to final approval, but approval as an IEEE standard is expected in the first half of 2023.

The IEEE P802.3dh Task Force is still in the process of developing a technically complete draft. At that point, it will go through the Working Group ballot process before it enters the Standards Association ballot process.

We look forward to future cooperation to advance Automotive Ethernet technology and adoption.

Sincerely,

David Law

Chair, IEEE 802.3 Ethernet Working Group
