

Final Network Services Report

September 15, 2023

Event: IEEE 802 Wireless Groups Interim Session

Venue: Grand Hyatt at Buckhead

Dates: September 11-15, 2023

SUMMARY

Linespeed Events, LLC is providing comprehensive wired and wireless network services in 10 meeting rooms, 2 foyers and 2 offices in the Grand Hyatt at Buckhead (GHB). Linespeed is also providing a local document server synchronized in near real time with mentor.ieee.org and a landing page (ieee802.linespeed.com), which contains links to local documents, meeting schedule, registration and venue information

The local area network (LAN) supporting the meeting space is comprised of a main distribution frame (MDF) and one intermediate distribution frame (IDF). Linespeed's wireless local area network (WLAN), comprised of 24 IEEE 802.11 a/g/n/ac/ax compliant access points is currently providing Wi-Fi 6e connectivity to 564 unique devices (laptops, tablets, smartphones, smartwatches, etc.) at this session.

IEEE 802W has contracted with GHB to provide a symmetrical 150Mb/s Internet circuit and a /29 CIDR block of public routable IPv4 address space for this event. Linespeed worked with GHB to increase access to 500Mbps of the venue's existing 1Gb/s Internet circuit.

Linespeed provisioned the network with redundant routers configured to failover in case of an outage.

Linespeed tested all Cat5 copper lines interconnecting IDFs and meeting room ports prior to deploying network hardware.

The network deployment diagram is shown in Figure 1.

Wireless client association counts for the week are shown in Figure 2.

Bandwidth utilization graphs for the past week, 48 hours and 24 hours are shown in Figures 3-5.

WLAN DEPLOYMENT

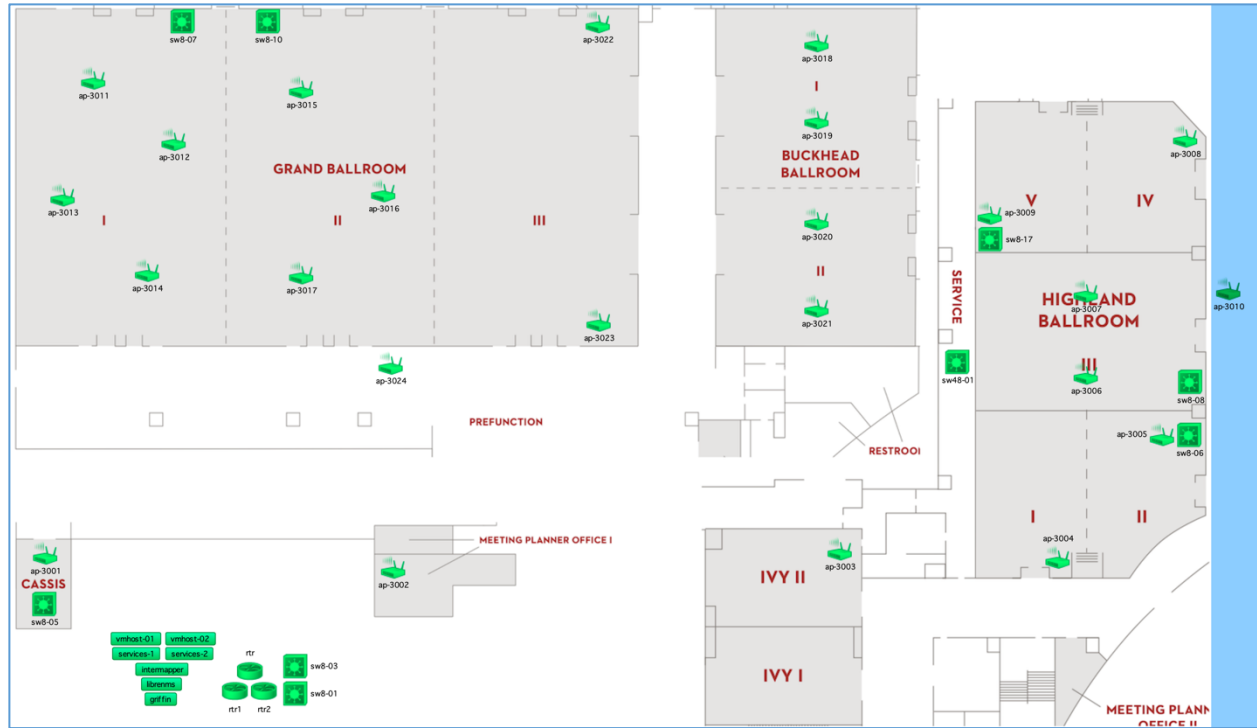

Figure 1. Twenty-four access points were deployed throughout the meeting space.

WIRELESS CLIENT COUNTS

Figure 2. Client association counts during the week.

BANDWIDTH UTILIZATION

Figure 3. External Bandwidth: past week

Figure 4. External Bandwidth: 48 hour period

Figure 5. External Bandwidth: 24 hour period

CURRENT SESSION STATISTICS

- Total Internet data inbound: 1.46 TB
- Total Internet data outbound: 334.59 GB
- Inbound Internet bandwidth utilization
 - Peak: 364.51 Mb/s
 - 95th Percentile: 99.56 Mb/s
- Outbound Internet bandwidth utilization
 - Peak: 94.95 Mb/s
 - 95th Percentile: 19.44 Mb/s
- Total wireless network associations: 564 unique devices

PREVIOUS SESSION STATISTICS (Interim Session – May 2023 - MCO)

- Total Internet data inbound: 1.58 TB
- Total Internet data outbound: 302.91 GB
- Inbound Internet bandwidth utilization
 - Peak: 2216.71 Mb/s
 - 95th Percentile: 127.38 Mb/s
- Outbound Internet bandwidth utilization
 - Peak: 243.35 Mb/s
 - 95th Percentile: 21.73 Mb/s
- Total wireless network associations: 559 unique devices
