

IEEE 802 LMCS annual review of subgroups - IEEE 802.11 Working Group

Date: 19 July 2024

Author:

Name	Company	Address	Phone	Email
Robert Stacey	Intel			robert.stacey@intel.com rjstacey@gmail.com

Scope

The 802.11 WG charter is to develop Physical layer and MAC layer specifications for wireless Local Area Networks (LANs) carried out under Project Authorization Requests (PAR) approved by the IEEE Standards Board and assigned to the 802.11 WG. Since the scope of standards work which comprises 802.11 WG activity is widely dispersed in time, technology and structure, individual standards activities within 802.11 WG are, at the discretion of the 802.11 WG, carried out by Task Groups (TGs) operating under, and reporting to the 802.11 WG.

See the [802.11 Operations Manual](#)

Duties

The 802.11 WG is chartered to:

- **Maintain and revise the 802.11 standard, amendments and recommended practices.**
- **Develop new standards in a reasonable time frame within the scope of the 802 LMSC.**
- **Forward these standards to International Standards Organization / International Engineering Consortium (ISO/IEC) JTC1.**
- **Maintain liaisons with other groups within 802 LMSC, and other relevant standards setting bodies and radio spectrum regulatory bodies.**

See the [802.11 Operations Manual](#)

Membership

802.11 membership is summarized as follows:

Aspirants	Potential Voters	Voters	ExOfficio
111	64	572	9

The current list of 802.11 members is available here:
