

Discussion on AICN Next Steps

Lily Lyu (Huawei)
Jieyue Li (CMCC)

January Interim 2025

AICN Status

Multiple contributions have been presented and discussed in AICN study item, including:

- AI background
- AI computing network requirements
- Load balancing issues
- Availability issues
- PHY security
-

The purpose of AICN study item is to:

- Encourage IEEE802 experts to look into this area
- Work toward AICN work item to publish NENDICA report, showing IEEE802 is interested in this area

Discussion: AICN Next Steps

The expected AICN work item aims to:

- Analyze network requirements for AI workloads
- Examine challenges in current network solution and study potential technologies
- Highlight IEEE802 interest and opportunities, encouraging industry's participation

AICN study item next steps:

- Converge current discussions in study item
 - Focusing on industry interest instead of content of work item
 - Making consensus on scope of work item and the time plan
- Initiate work item proposal

Thanks!
