Subclause: 11A.22.3
Page: XCIII
Line: Table 11A-3
Comment: The text in the table states, "In a response: TSPEC (see 7.3.2.30), followed by zero or one Schedule (See 7.3.2.34)". This is confusing since it implies that some IEs mandated by clause 11.4 are not required in a response.

SuggestedRemedy

Amend the sentence to read as follows, "In a response: a TSPEC element (see 7.3.2.30), followed by zero or one Schedule elements (See 7.3.2.34), followed by zero or more Delay elements (see 7.3.2.32), followed by other optional elements as specified in 11.4".

In table 11A-3, The text in the table states, "In a response: TSPEC (see 7.3.2.30), followed by zero or one Schedule (See 7.3.2.34)". This is confusing since it implies that some IEs mandated by clause 11.4 are not required in a response.
(Submitted on behalf of Dave Stephenson)

SuggestedRemedy

Amend the sentence to read as follows, "In a response: a TSPEC element (see 7.3.2.30), followed by zero or one Schedule elements (See 7.3.2.34), followed by zero or more Delay elements (see 7.3.2.32), followed by other optional elements as specified in 11.4".
Note: I think the elements which are not part of the non-AP STA's request, but may be part of the AP's response are worth mentioning explicitly. For the sake of brevity, I suggested referring to clause 11.4 to address other elements which may be present in the response. Alternatively, the following resolution could also be used: "In a response: a TSPEC element (see 7.3.2.30), followed by zero or one Schedule elements (See 7.3.2.34), followed by zero or one Delay elements (see 7.3.2.32), followed by zero or more TCLAS elements (see 7.3.2.31), followed by zero or on TCLAS processing elements (see 7.3.2.33)".
