

**Project: IEEE P802.15 Working Group for Wireless Personal Area Networks (WPANs)**

**Submission Title:** [PAC Service and Requirements Corresponding to Call for Application]

**Date Submitted:** [13 May 2012]

**Source:** [Daegyun Kim, Seung-Hoon Park, Chiwoo Lim, Kyungkyu Kim and Won-il Roh] Company  
[Samsung Electronics]

**Address** [416, Maetan-3Dong, Yeongtong-Gu, Suwon-Si, Gyeonggi-Do, 443-742, Korea]

**Voice:**[+82-10-9530-5088], **FAX:** [+82-31-279-0813], **E-Mail:**[daegyun@samsung.com]

**Re:** [.]

**Abstract:** [Service and requirements for Peer Aware Communication (PAC)]

**Purpose:** [To discuss PAC service and requirements corresponding to call for application]

**Notice:** This document has been prepared to assist the IEEE P802.15. It is offered as a basis for discussion and is not binding on the contributing individual(s) or organization(s). The material in this document is subject to change in form and content after further study. The contributor(s) reserve(s) the right to add, amend or withdraw material contained herein.

**Release:** The contributor acknowledges and accepts that this contribution becomes the property of IEEE and may be made publicly available by P802.15.

Samsung

# Characteristics of Use Cases

Category	Data Rate	Range	Latency	Robustness
Game	Medium	Short	Low	Low ~ Medium
SNS	Medium	Long	Medium	Low
Advertisement	Medium ~ High	Short ~ Medium	Low	Low
Convergence (CE connectivity)	Medium ~ High	Short	High	Low ~ Medium
Public safety	Low	Long	Medium ~ High	High

# Service Requirements

Service Class	Applications	Data Rate	Delay (Interactivity)	BER
<b>Multimedia services</b>	VoIP <sup>2)</sup>	8 - 64kbps	conversational (100-200ms)	$10^{-4} \sim 10^{-5}$
	N-Screen video Streaming <sup>1)</sup>	Up to 5 Mbps	few seconds (>200ms)	$10^{-6} \sim 10^{-9}$
	Personal contents <sup>1)</sup>	2-5Mbps	conversational (100-200ms)	$10^{-3} \sim 10^{-6}$
<b>Data service</b>	File Sharing <sup>1)</sup>	Up to 5 Mbps	few seconds (>200ms)	$10^{-6}$
<b>Interactive services</b>	Video games <sup>4)</sup>	64-512kbps	conversational (100-200ms)	$10^{-3} - 10^{-6}$
<b>Proximity services</b>	SNS <sup>1)</sup>	8-512Kbps	few seconds (>200ms)	$10^{-6} - 10^{-9}$
	Advertisement <sup>1)</sup>	8-512Kbps	few seconds (>200ms)	$10^{-6} - 10^{-9}$
	Queue (Interactive) <sup>1)</sup>	64-512kbps	conversational (100-200ms)	$10^{-6}$
<b>Public safety services</b>	Unicast Service <sup>3)</sup>	64 - 512Kbps (option: 1Mbps)	conversational (100-200ms)	$10^{-6}$
	MS relay at emergency <sup>3)</sup>	64 - 512Kbps (option: 1Mbps)	interactive / control (20 - 100 ms)	$10^{-6} - 10^{-9}$
	Broadcast at emergency <sup>3)</sup>	64 - 512Kbps (option: 1Mbps)	few seconds (>200ms)	$10^{-3} - 10^{-6}$
<b>CE device control services</b>	Remote Control <sup>2)</sup>	8- 64Kbps	interactive / control (20 - 100 ms)	$10^{-3} - 10^{-6}$
	Monitoring & repairing(water, gas) <sup>2)</sup>	8- 64Kbps	interactive / control (20 - 100 ms)	$10^{-3} - 10^{-6}$

1. IST-4-027756 WINNER II D6.11.2 v1.0 Key Scenarios and Implications (WINNER II)

2. D1.1 Scenarios and Requirements Specification (Seventh Framework Program)

3. Radio communication objectives and requirements for public protection and disaster relief ITU-R M.2033

4. HyoJoo Park, TaeYong Kim, and SaJoong Kim "Network Traffic Analysis and Modeling for Games" in proc. WINE 2005.

5. "Functional Requirements for the 802.16.3 Interoperability Standard", IEEE 802.16.3-00/02r4, September 22, 2000.

# Functional Requirements

- **Protocol**
  - PHY/MAC/Link layer
  - Network layer support : open
  - Application layer support
- **Scalable system**
  - Easily adapt to increased devices with minimum configuration change
- **QoS support**
  - Best effort service:
    - instant messaging, file sharing
  - Near real time:
    - video and audio streaming, multiplayer gaming, proximity based service
  - Real time service :
    - VoIP
- **Decentralized operation**
  - No centralized controller
  - Operation based on mutual interaction
- **Synchronous operation**
  - Periodic wake up and sleep operation for low power consumption
  - Efficient resource management
- **Security**
  - Authentication

# Desired Features

## PHY

- Duplex
  - TDD
- OFDM Modulation
- Bandwidth
  - 1.25, 5, 10, 20MHz
- Modulation
  - BPSK, QPSK, 16QAM, 64QAM
- Link Adaptation
  - Adaptive Coding Modulation
- Power control
  - Interference management
- Synchronization
  - Initial synchronization
  - Resynchronization

## MAC

- Multiple access
  - TDMA
- Distributed operation
  - Scheduling
  - Interference management
- Identification
  - Device ID and Link ID
  - Multiple Link ID support
- Multi-hop
  - Discovery
  - Data transmission
- Security
  - Mutual authentication or
  - External authentication center

# Performance Requirements

		Performance	Notes
Data rate	Peak spectral efficiency	Up to 3 bps/Hz	1 tx Ant, 64QAM
	Areal spectral efficiency	X bps/Hz/km <sup>2</sup> (TBD)	Outdoor, indoor
Error rate	PER	$10^{-4} \sim 10^{-2}$	HARQ or ARQ
Latency	Link setup time	Less than 10ms	After discovery
Mobility	Stationary (no mobility) Pedestrian (up to 10 km/h) Vehicular (up to 100 km/h)	Best performance Best effort Support	
Data transmission range	~ 100m 100~500m 500m ~	Best performance Best effort Support	
Discovery	Capacity	hundreds of device/service	Scalable parameter
	Range	hundreds of meter	Single hop, Scalable
	Time	Less than 10s	

# Guideline Documents

- **Application matrix**
- **Technical requirements document**
  - Operation frequency
  - QoS Class
  - Peak spectral efficiency, latency, BER/PER
  - Transmission range, mobility
  - Power consumption
  - Complexity, co-existence, etc.
- **Functional description document**
  - Operation procedure
  - Discovery information (user, application, device ID etc.)
- **Evaluation methodology & Channel model**
  - Areal spectral efficiency, delay, fairness etc.
  - Traffic model: full buffer, ftp traffic, voip, gaming
  - Indoor, outdoor, etc.

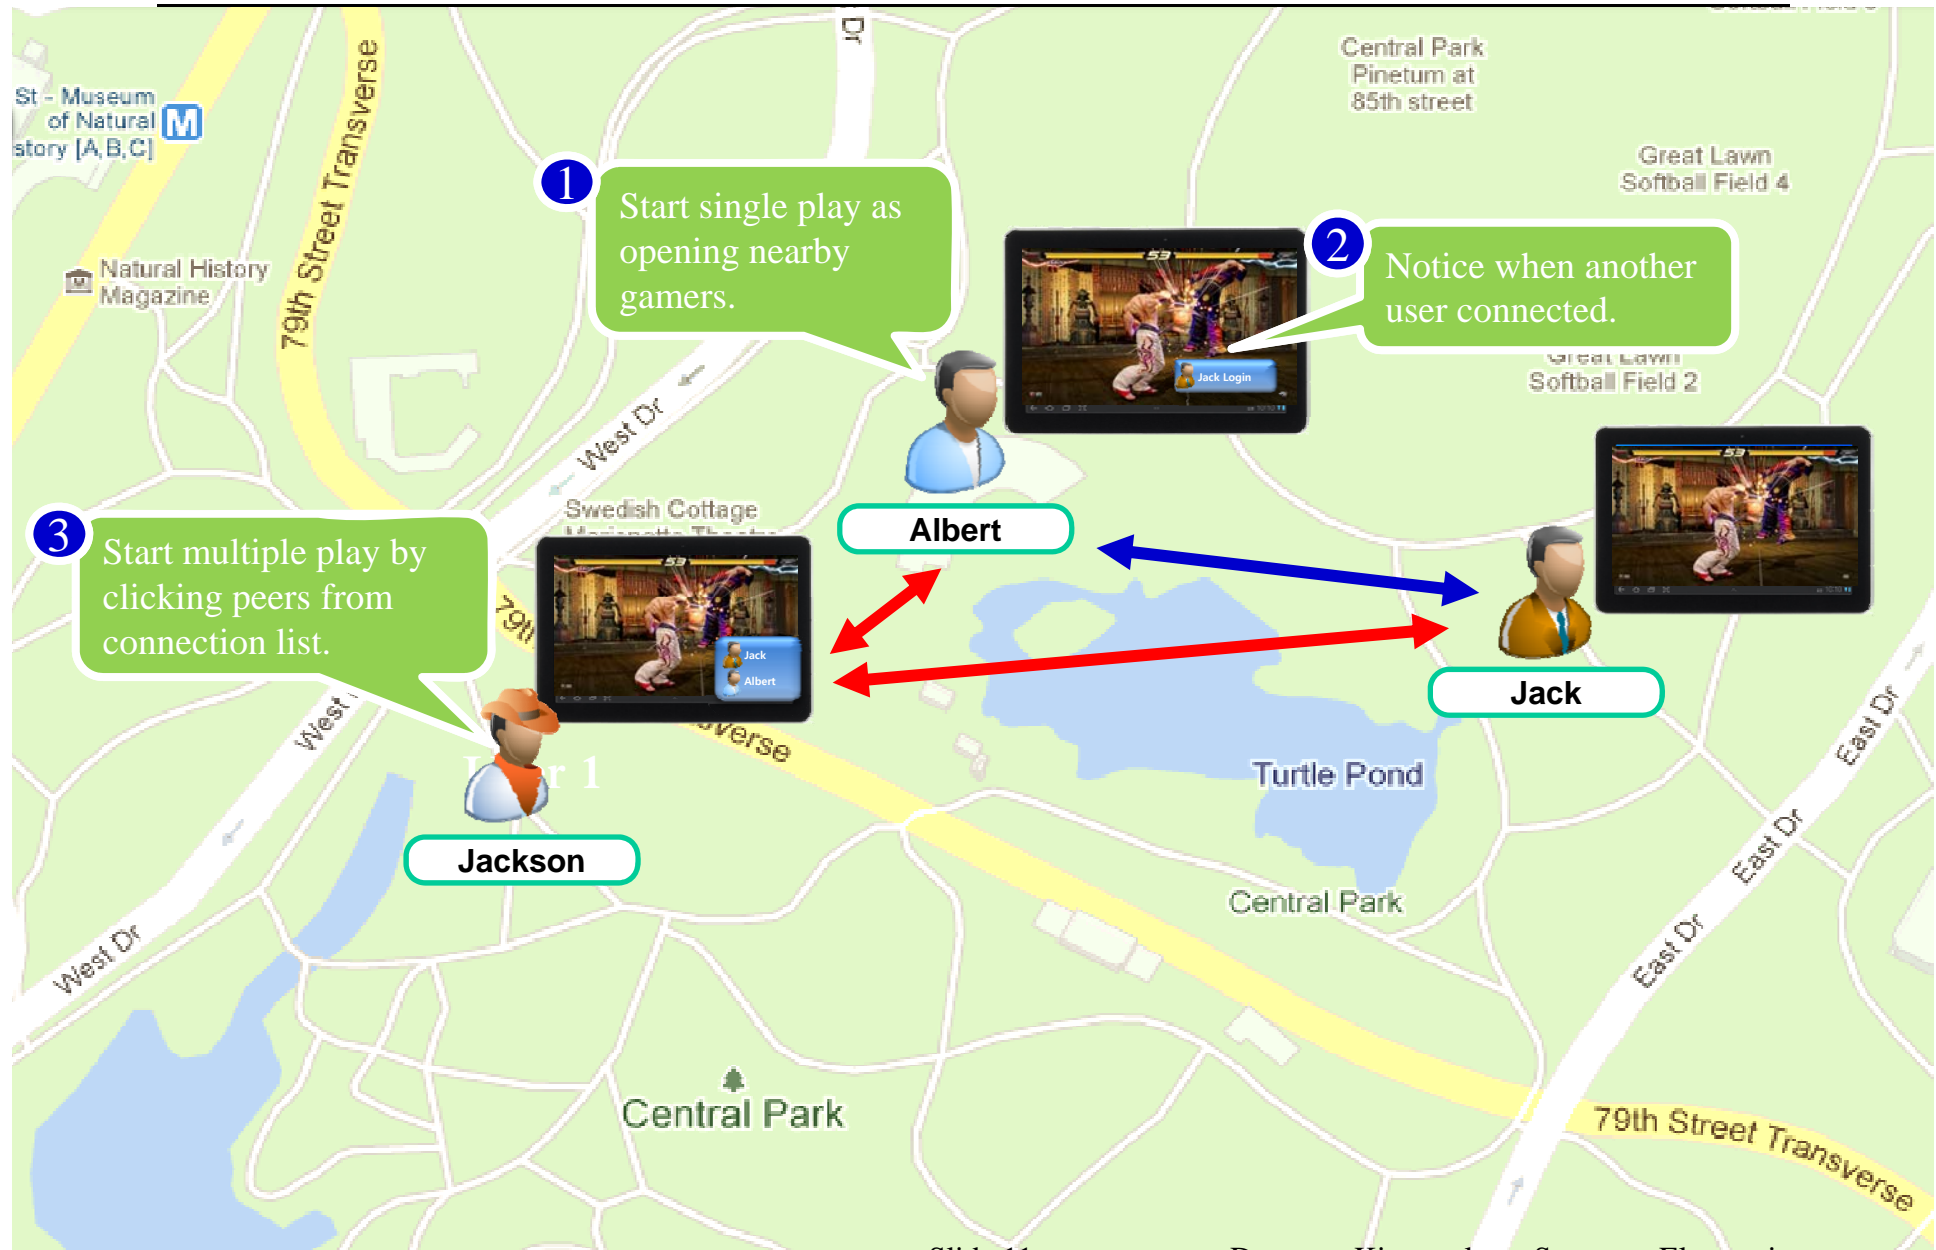

# Schedule

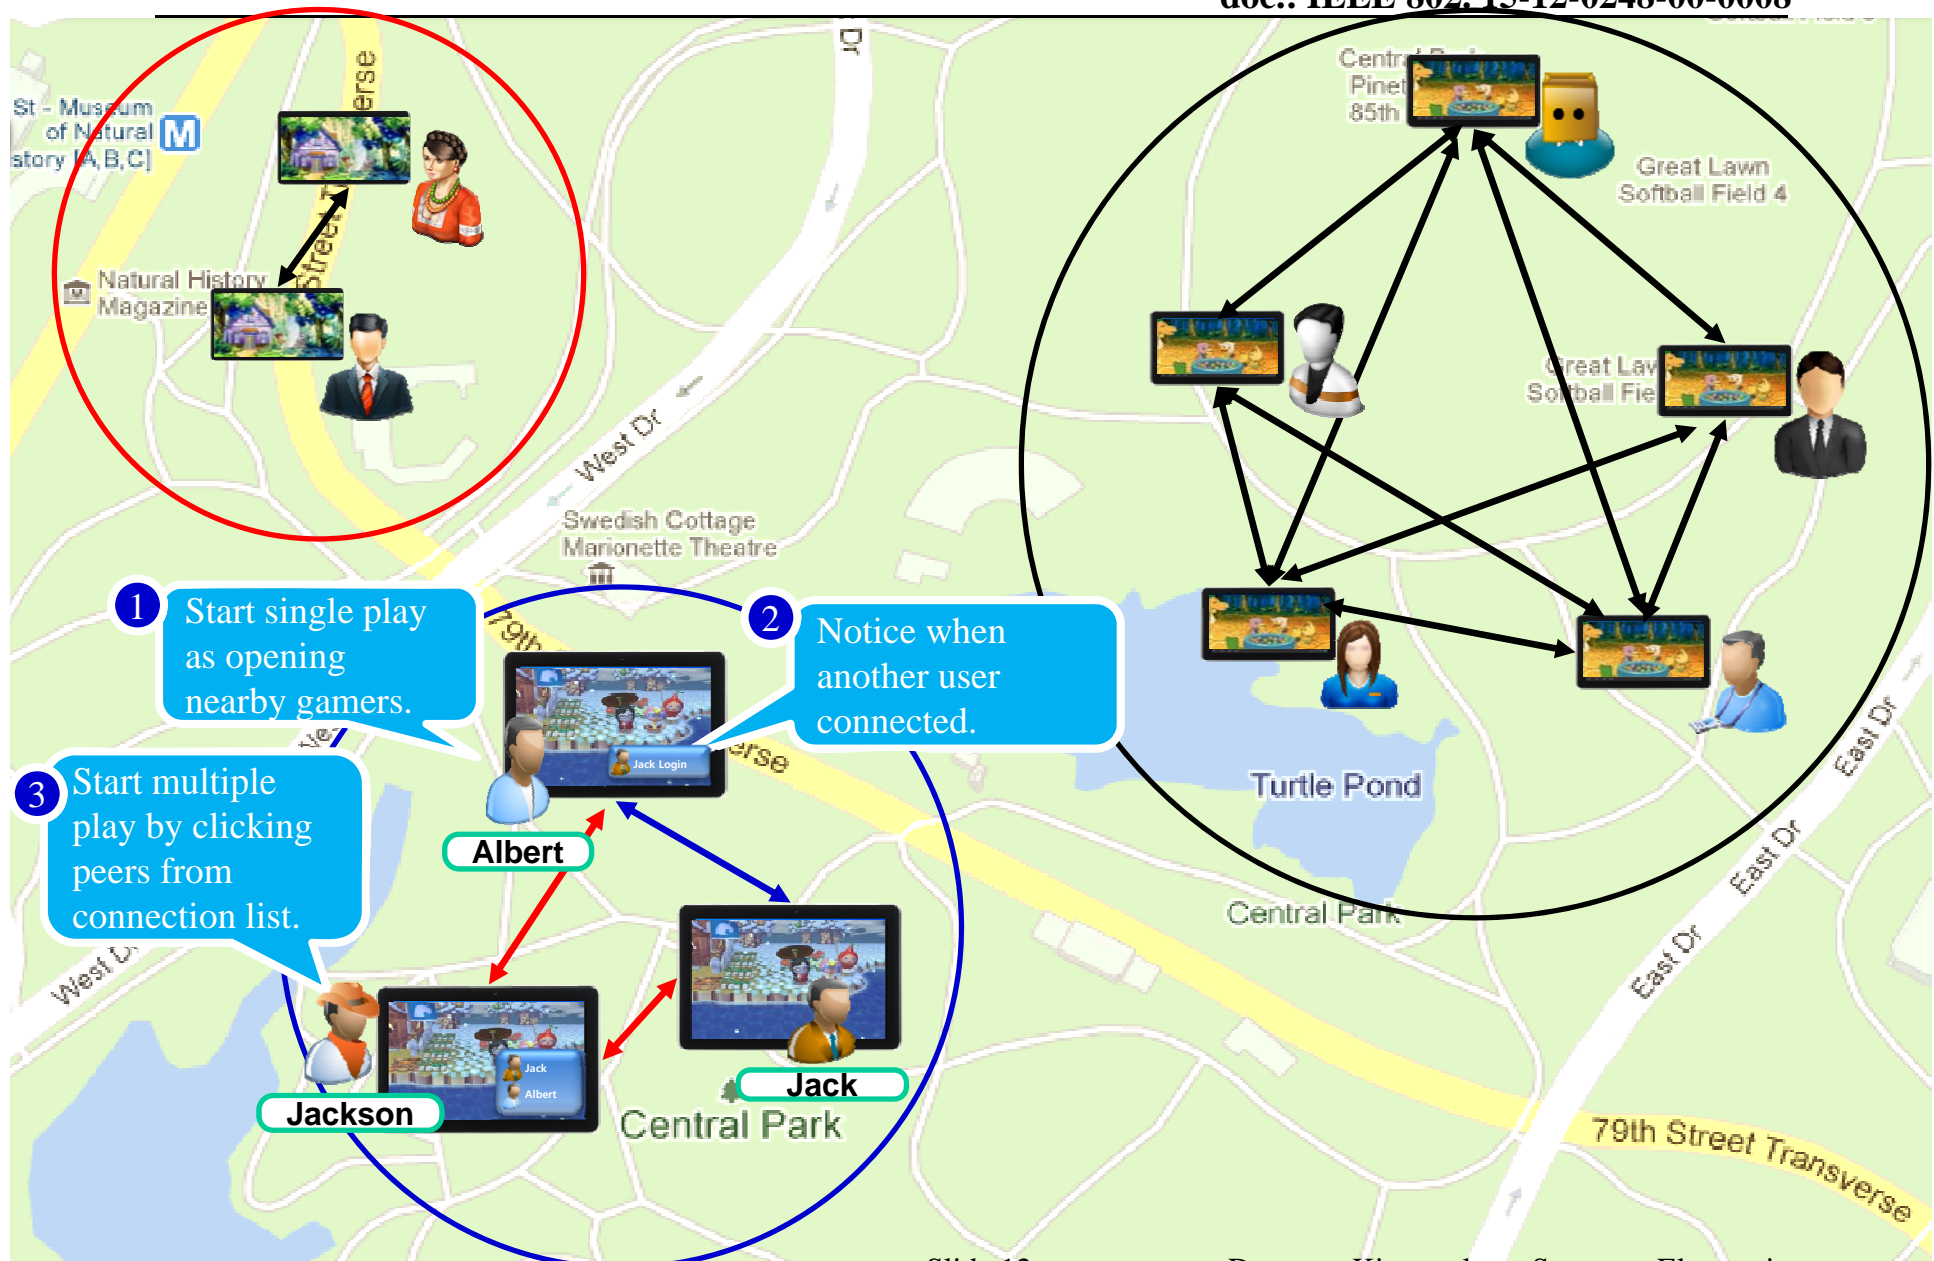

- May 2012 ~ Nov 2012 : Guideline documents discussion
- Jan 2013 : Guideline documents approval
- Mar 2013 : Proposal submission
- Jul 2013 : Merger process
- Sep 2013 ~ Jan 2015 : Letter ballot
- Mar 2015 ~ Jul 2015 : Sponsor ballot
- Aug 2015 : RevCom submission

### Public Information Service

**doc.: IEEE 802. 15-12-0248-00-0008**

The diagram illustrates the process of requesting and broadcasting ad services in a specific geographic area (Rome, Italy). The map shows the location of the Ad Marketing Agent and two shops (McDonald's and T.G.I. Fridays).

**Callout 1:** Request for Ad Service to Ad Marketing Agent. This callout is associated with both the Shop (McDonald's) and the Shop (T.G.I. Fridays).

**Callout 2:** Broadcast the interest Ad Marketing Service for McDonald and T.G.I.F. This callout is associated with the Ad Marketing Agent.
