

P802.15.4z

Submitter Email: bheile@ieee.org

Type of Project: Amendment to IEEE Standard 802.15.4-2015

PAR Request Date: 18-Jan-2018

PAR Approval Date:

PAR Expiration Date:

Status: Unapproved PAR, PAR for an Amendment to an existing IEEE Standard

1.1 Project Number: P802.15.4z

1.2 Type of Document: Standard

1.3 Life Cycle: Full Use

2.1 Title: Standard for Low-Rate Wireless Networks

Amendment enhancing existing Impulse Radio-Ultra Wide Band (IR-UWB) Physical Layers (PHYs) and associated ranging techniques

3.1 Working Group: Wireless Personal Area Network (WPAN) Working Group (C/LM/WG802.15)

Contact Information for Working Group Chair

Name: Robert Heile

Email Address: bheile@ieee.org

Phone: 781-929-4832

Contact Information for Working Group Vice-Chair

Name: PATRICK KINNEY

Email Address: pat.kinney@kinneyconsultingllc.com

Phone: 847-960-3715

3.2 Sponsoring Society and Committee: IEEE Computer Society/LAN/MAN Standards Committee (C/LM)

Contact Information for Sponsor Chair

Name: Paul Nikolich

Email Address: p.nikolich@ieee.org

Phone: 8572050050

Contact Information for Standards Representative

Name: James Gilb

Email Address: gilb@ieee.org

Phone: 858-229-4822

4.1 Type of Ballot: Individual

4.2 Expected Date of submission of draft to the IEEE-SA for Initial Sponsor Ballot: 02/2019

4.3 Projected Completion Date for Submittal to RevCom

Note: Usual minimum time between initial sponsor ballot and submission to Revcom is 6 months.: 08/2019

5.1 Approximate number of people expected to be actively involved in the development of this project: 60

5.2.a. Scope of the complete standard: This standard defines the physical layer (PHY) and medium access control (MAC) sublayer specifications for low-data-rate wireless connectivity with fixed, portable, and moving devices with no battery or very limited battery consumption requirements. In addition, the standard provides modes that allow for precision ranging. PHYs are defined for devices operating various license-free bands in a variety of geographic regions.

5.2.b. Scope of the project: This amendment enhances the existing IR-UWB PHYs and associated ranging techniques within IEEE Std 802.15.4 Current Revision. Potential areas of enhancement include additional coding and preamble options, improvements to existing modulations to increase the integrity and accuracy of the ranging measurements, additional information element definitions to facilitate ranging information exchange, and others as appropriate. The goal is to better address current applications and to meet the needs of a wider set of applications where the integrity and accuracy of distance measurement are important. The amendment also defines necessary MAC changes as needed to support these PHY enhancements.

5.3 Is the completion of this standard dependent upon the completion of another standard:

5.4 Purpose: The standard provides for ultra low complexity, ultra low cost, ultra low power consumption, and low data rate wireless connectivity among inexpensive devices. In addition, one of the alternate PHYs provides precision ranging capability that is accurate to one meter. Multiple PHYs are defined to support a variety of frequency bands.

5.5 Need for the Project: IEEE 802.15.4 is a widely used standard in a variety of applications which employ the ranging capabilities enabled by the IR-UWB PHYs as defined by the current standard. Current users and product manufacturers have identified the need for improved efficiency, integrity and accuracy of the existing ranging measurement methods in order to expand the usefulness of the standard for applications such as RFID and Automotive, in particular, automotive remote control, and similar personal devices, as well as to open up new areas of application.

5.6 Stakeholders for the Standard: The stakeholders include silicon vendors, manufacturers and users of automotive, remote control, telecom(smart phones), medical, environmental, energy, and consumer electronics equipment and manufacturers and users of equipment involving the use of wireless sensor and control networks.

Intellectual Property

6.1.a. Is the Sponsor aware of any copyright permissions needed for this project?: No

6.1.b. Is the Sponsor aware of possible registration activity related to this project?: Yes

If yes please explain: The RAC has requested routine review of PHY oriented project, although no special registration activity is expected.

7.1 Are there other standards or projects with a similar scope?: No

7.2 Joint Development

Is it the intent to develop this document jointly with another organization?: No

8.1 Additional Explanatory Notes:
