Roger B. Marks
Chair, IEEE 802.16 Working Group
r.b.marks@ieee.org
13 February 2012

Dear P802.16.1 Ballot Group:

Thank you for your participation in the recirculation of P802.16.1/D3, which ran from 16 December 2011 to 15 January 2012. Prior to comment resolution, the numerical results were 106 Approve, 2 Disapprove with Comment, and 8 Abstain.

Comments were resolved by the IEEE 802.16 Working Group during its Session #77 in January. We have uploaded the resolutions to the IEEE-SA myBallot system. In addition to the 20 comments submitted through myBallot, the 802.16 Working Group received another 13 comments directly; the latter are not associated with Disapprove votes. The Working Group has posted the full documentation regarding the resolution of all of these comments, along with the editor's implementation notes, in document IEEE 802.16-12-0117-02 at <https://mentor.ieee.org/802.16/dcn/12/16-12-0117-02.pdf>. In that file, the myBallot comments are numbered 1-20, corresponding to the myBallot numbers; the additional comments are numbered 1001-1013. Note that some changes refer to documents contributed directly to the 802.16 Working Group. These are available at https://mentor.ieee.org/802.16/documents?is_group=01R0.

We are requesting that the IEEE Balloting Center initiate a recirculation of the new draft P802.16.1/D4.

Please take this opportunity to review the material. Since this is a recirculation ballot, you need respond only if you wish to change your initial vote or submit additional comments within scope of the recirculation. No comment will be considered as a valid element of a Disapprove vote unless the voter enters it into the myBallot database and designates it appropriately.

If you have voted Disapprove, I urge you to review the comment resolutions and let us know which, if any, of your comments have been satisfactorily resolved. If you choose to cast an Approve vote, we will assume that all of them are resolved to your satisfaction.

Sincerely,

Roger Marks
Chair, IEEE 802.16 Working Group on Broadband Wireless Access
