

IEEE 802.16 Working Group on Broadband Wireless Access

Call for Contributions

IEEE Project P802.16.3:

Mobile Broadband Network Performance Measurements

Issued: 15 November 2012

Deadline: 9 January 2013 AOE

On 30 August 2012, the IEEE-SA Standards Board approved Project Authorization Request (PAR) [P802.16.3](#) for the development of a new standalone standard on *Mobile Broadband Network Performance Measurements*. The [IEEE 802.16 Working Group](#) is assigned to develop the standardization project.

During its [Session #82](#) (12-15 November 2012 in San Antonio, TX, USA), the IEEE 802.16 Working Group reviewed comments on its “Applications and Requirements for Mobile Broadband Network Performance Measurements” draft. Consequently, it developed a new draft “IEEE 802.16.3 Architecture and Requirements for Mobile Broadband Network Performance Measurements.”

The IEEE 802.16 Working Group will continue development of the project during its [Session #83](#) (14-17 Jan 2013 in Vancouver, BC, Canada).

In advance, this Call for Contributions solicits input documentation toward the development of P802.16.3, particularly on the following topics:

- (1) Comments on working document [IEEE 802.16-12-0682-00](#) (“[Draft] IEEE 802.16.3 Architecture and Requirements for Mobile Broadband Network Performance Measurements”) and contributions toward enhancement of that content, including further information on the proposed architecture, metrics, and requirements.
- (2) Proposed development schedules.

Submit your contribution by the deadline above following the IEEE 802.16 Document Submission Instructions <http://ieee802.org/16/submit.html> using the File Code "03R0".
