

## IEEE 802.16 Working Group on Broadband Wireless Access

<http://WirelessMAN.org>

Roger B. Marks  
Chair, IEEE 802.16 Working Group  
[r.b.marks@ieee.org](mailto:r.b.marks@ieee.org)  
17 January 2013

Dear P802.16n Ballot Group:

Thank you for your participation in the second recirculation of the IEEE-SA Sponsor Ballot of P802.16n.

At this point in the ballot, the approval ratio stands at 100%. During the ballot period, several comments were received directly by the Working Group; these are not associated with Disapprove votes. Those comments were resolved by the IEEE 802.16 Working Group during its Session #83 of 14-17 January. The Working Group has posted the documentation of these comments in document IEEE 802.16-13-0013-03 at <http://doc.wirelessman.org/16-13-0013-03>.

We are requesting that the IEEE Balloting Center initiate a recirculation of the new draft P802.16n/D8. Note that the base standard being amended is IEEE Std 802.16-2012, as previously amended by IEEE 802.16p-2012. So that you may understand the context of the draft amendment, we have previously provided you with the base standard. For your information, we are providing a file (P80216n\_D8delta) prepared to indicate the changes made in P802.16n/D8 with respect to P802.16n/D7.

Please take this opportunity to review the material. Note that comment will be considered as a valid element of a Disapprove vote unless the voter enters it into the myBallot database and designates it appropriately.

Sincerely,

Roger Marks  
Chair, IEEE 802.16 Working Group on Broadband Wireless Access
