Event or Session – The overall meeting event that contains one or many sub-meetings (Breakouts).

Timeslot – Times that breakouts may occur. Timeslots regulate when meetings should be occurring during your event and prevent attendees from logging their attendance in multiple concurrent meetings.

Breakout or Meeting – This is the specific meeting that a user may log attendance for. He/she may only log attendance for one breakout occurring at a particular time.

You must first create an Event, then the Timeslots, then Breakouts.

NOTE: If you are holding a meeting with another group (Plenary Session) the person with group access must set up the Event and Timeslot. Contact your Staff Liaison or Solutions Staff for assistance.

Meetings can be associated with a working group or particular PAR/project

Select the timeslot for the start and end. You can span multiple timeslots.

Use the override fields to start/end at a different time than what is presented in the timeslot field

Enter the amount of attendance credit this breakout is to be given.

The facilitator should be the person chairing the meeting. This will default to the Working Group Chair.

Reports Menu

The screenshot shows a navigation menu with the following items: Attendance, Reports, Sessions, Setup, and Export. The 'Reports' item is circled in red. Below the navigation bar is the IEEE IMAT logo. Under the logo, the word 'Reports' is displayed in a large blue font. Below 'Reports' are the links 'Help index' and 'Committee ▲'. At the bottom of the menu, the text 'C/LM/WG802.3' is followed by the links 'attendance summary, session attendance'. Two callout boxes provide instructions: one points to 'attendance summary' and the other points to 'session attendance'.
