5.1 Approximate number of people expected to be actively involved in the development of this project: 18
5.2 Scope: This recommended practice specifies a privacy threat model for IEEE 802 technologies and provides recommendations on how to protect against privacy threats.

5.3 Is the completion of this standard dependent upon the completion of another standard: No
5.4 Purpose: To develop a recommendation that defines a privacy threat model and a privacy guideline for IEEE 802 standards developers.

5.5 Need for the Project: IEEE 802 technologies play a major role in Internet connectivity, yet have the potential to disclose their users' private information*. A recommended practice to promote a consistent approach by IEEE 802 protocol developers to mitigate Internet privacy threats is needed.
